

CONNECTIVITY™

NEWS FOR THE CANADIAN ProVM MARKET

GIVING TO YOUR COMMUNITY MAKES A BETTER PLACE TO LIVE AND WORK

Build your business and build respect

Making the communities you work in a better place to live is smart business. Corporate giving signals a commitment and an investment in the community that sets you apart from competitors and builds stronger relationships with your customers.

There are many ways you can build respect and goodwill, as well as enhance your reputation.

Every community and every business is unique in its needs and resources, so understanding what the needs and opportunities are is the first step:

- Identify a need within the community or ask prominent local organizations how they could use your help. It may be donating computers to school programs or helping with a food drive.
- It is often said, 'if you want something done ask a busy person' but that means the same people often do much of the community volunteer work. So if you identify an opportunity to help there, the impact can be immense.
- Sponsoring a sports team is an excellent vehicle for name recognition on jerseys. You could also sponsor the Most Valuable Player or Most Sportsmanlike since this puts

your name in front of current and potential customers [the parents] and the next generation [the players]. Attending the awards ceremony is a great opportunity to connect with these customers.

- Give to environmental causes. Offer to spruce up a local park. Engage your staff in the activity and make it a day with their families.
- Encourage your staff with special skills to give back to the community as coaches and leaders.
- Sponsor an event with community organizations to present an aspect of agriculture. Make it a hands-on experience. Look for organizations that share your company's values.
- Establish networking with philanthropists. Philanthropic organizations are often filled with the movers and shakers in a community. Building mutual trust and respect with them is an essential factor in doing business.

We work where we live, we live where our customers and their families work and play.

Making your company a positive force in the community builds greater employee cohesion, makes them more motivated, and boosts morale.

Control brush year-round.

Garlon™ RTU

HERBICIDE

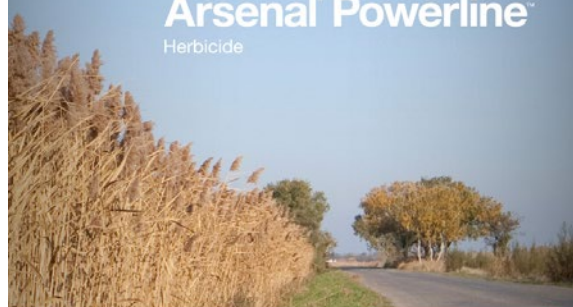

Dow AgroSciences

A new solution for non-aquatic phragmites.

Arsenal Powerline™

Herbicide

Always read and follow label directions.
