

**A safe and  
economical  
method of flying  
insect control**

# **The FLYLight jr**

Expose the glue trap, plug it in, and trap flying insects such as common flies, cluster flies, yellow jackets, and many other species of nuisance pests. This light is most attractive to the widest range of phototropic (light sensitive) flying insects, trapping them on the glue board upon entering the **FlyLight jr**. Excellent for use as an IPM monitoring unit.

**It's simple,  
it's silent...  
it works!**

## **DIMENSIONS**

Width	21 in / 53.3 cm
Height	7.75 in / 19.7 cm
Depth	4.75 in / 12.1 cm
Shipping Weight	6.5 lbs / 3 kg
Net Weight	5.5 lbs / 2.5 kg

### **Attractive, suitable for use in sensitive areas and CSA approved for Canada and the U.S.A.**

- Quick release glue board holder permits discreet glue board replacement. The hidden glue board doesn't display captured dead insects.
- Anodized aluminum diffuser back plate intensifies attractant power of the UV lamps.
- The unit can be wall mounted or sit on a surface.

### **The "U" shaped glue board with comfort zone encourages fly retention**

- The "U" shaped glue board holder also resists dust giving the glue board a longer life.
- Convenient replacement glue boards are UV stabilized, non-toxic and last up to 30 days.

### **Efficient lamp ballast, provides reliable quick start**

- The **FlyLight jr** comes equipped with a high efficiency ballast that drives both lamps at full 25-watt output. No lamp starters to replace. No high or low voltage electric grid system to maintain.
- The **FlyLight jr** is more efficient, easier to clean and simple to maintain.
- 1 year limited warranty (except glue boards).
