# RG-1002TJ

## UPGRADE YOUR FLY CONTROL!

Advantages of buying Gardner RG-1002TJ insect light trap	Disadvantages of Gilbert 601TJ insect light trap
Higher efficacy – 35 % larger electrified grid is mounted on front door – flying insects <u>can not</u> escape capture	Lower catch rate- <u>electrified</u> grid is smaller and located adjacent to lamps. Flying insect are known to enter trap and escape unharmed.
Self leveling mounting bracket included as standard item	No mounting bracket available.
Mounting slots are visible from front- no measuring needed	Mounting slots are located on rear of unit. Must <u>measure</u> distance between keyhole slots to install.
Larger open surface to insect lamps on front door providing 35% more UV output.	Lamps are covered by opaque shield reducing the UV attraction.
FEP safety coated lamps are “included” as a standard item- no extra charge.	FEP safety coated are not included- must be purchased at a premium price.
Large opening area for easy of service and lamp replacement	Shield is covering lamps and electrified
Better Value- Lower price
