

# **Detail® Herbicide**

## **Unique Value Positioning Statement**

**Target**  
(For Whom)

---

**Bareground vegetation management applicators who need to control all broadleaf weeds, regardless of herbicide resistance**

---

**Framework**  
(Is the...)

---

**Liquid-formulated, Arsenal Powerline and Glyphosate top-up herbicide**

---

**Benefit**  
(That...)

---

**Provides quick and complete burndown and residual control of Group 2, 4 & Glyphosate-resistant kochia and other tough-to-control weeds and is easy and quick to mix, reducing mixing time**

---

**Value**  
(So that...)

---

**You can show your customers quick, complete and lasting results**

---

# Detail® Herbicide

## Technical Information

### Active Ingredient

**Saflufenacil (Kixor – 342 g/L)**

### Formulation

**Suspension Concentrate (Liquid)**

### Rate

**Burndown & Residual** – 435 mL/ha  
**Burndown only** – 145 - 290 mL/ha

### Rain fast

**1 Hour**

### Re-Entry Interval

**Non-Military Sites – Spray is Dry; Military – 2 Days**

### Best Practices

**Contact Herbicide. Use >200 L/ha water volume for good coverage. Use a good non-ionic Surfactant (0.5% - 1% v/v) Ensure PH of tank mix is 6 – 7.5**
